Compatibility Testing

Cross-browser testing ensures robust apps

Shravas's Compatibility Testing Services enable applications to run seamlessly across multiple OSs, Browsers, & Mobiles.

Compatibility Testing Services

- Shravas provides comprehensive Compatibility Testing services that can be performed across a variety of Operating Systems, browsers, databases, servers, hardware, different versions, configurations, display resolutions, etc. Shravas has an extensive compatibility lab covering the latest operating systems, platforms, peripherals and hardware to ensure that your product performs over a wide range of technical specifications. Any peripheral hardware device or server configuration that we do not possess, can be quickly acquired through our associated hardware and software vendor partners.
- Whether you produce educational software, online applications, websites, network software or utilities, our compatibility services can build a configuration matrix and methodology to identify the optimum number of combinations. Depending on the complexity of your product and the number of platforms to be tested, projects can be performed in a week or less.

Shravas's Cross-Browser Testing

Our team of testers have in-depth experience in implementing and performing web testing using cross browser testing tools that help you test browser compatibility.

A few differentiators of our compatibility testing services are:

- Cross-browser testing for latest versions currently in use including IE, Mozilla, Chrome, Safari, Opera, Edge
- Cost-effective matrix ranging from basic collection to a complex enterprise server farm
- Compatibility Test Plan specifying exactly for the tests needed to be executed
- Our testing lab offers all the hardware and software needed for such testing
- Test execution by our staff of experienced test engineers
- Maximum range of test configurations matrix

Our Mobile Device Compatibility Testing Lab

Shravas's Mobile Device Lab maximizes test coverage and minimizes risks. It enables testing of a huge matrix of devices, operating system versions, and screen resolutions. The hosted lab supports critical security requirements, ensuring the security of the highest degree.

By creating a round-the-clock continuous integration testing environment, Shravas Technology's dedicated mobile device lab ensures quick go-to-market.

Our Compatibility Testing Services Suite includes

- A variety of cross browser testing tools
- Comprehensive cross browser testing and web browsers testing
- We support Windows versions: Windows 10, Windows 11, Windows 8.1, Windows 8, macOS Ventura - 13, macOS Monterey - 12, macOS Big Sur - 11, macOS Catalina - 10.15, macOS Mojave - 10.14, Linux
- Resolutions: 800x600 1024x768 1152x864 1280x768 1280x800 1280x960 1280x1024 1400x1050 1440x900 1600x1200 1680x1050 1920x1080 1920x1200 2560x1600
- Latest browser versions currently in use including IE, Mozilla, Chrome, Safari, Opera, Edge

Tools we use:

BrowserStack

SAUCELABS
